Skills

Programming Languages: C++, C#, Python, Java, SQL, JavaScript

Game Development Tools: Unreal Engine, Unity, Scripting, Blueprints, Editor plugins

Programming Concepts: Object-Oriented Programming, Game Mechanics, Debugging, Optimization, Profiling, Multithreading, Animation systems, State machines, REST/LLM APIs, MCP

Mathematics: Calculus, Physics, Game-Related Math, 3D Math

Game Design: Game Design, Level Design, Gameplay Prototyping

Teamwork: Professional Communication, Team Collaboration, Leading Teams

Tools & Collaboration: GitHub, Perforce, Slack, Jira, MS Teams, Copilot, Claude Code

Education

Polsko-Japońska Akademia Technik Komputerowych
Sept 2022 - Feb 2026

Bachelor: Computer Science
Specialty: Game Development

Languages

English: C1-C2 (Advanced)

Ukrainian: Native

Polish: Basic

Oleksandr Pryimak

Programmer, game developer

Gameplay and engine programmer with **C++** and **C#** experience in **Unreal Engine** and **Unity**. **Ex-Activision programming intern** who cut compilation time of certain classes by up to 99% in Black Ops 7's **asset build pipeline**. Gameplay programmer at Cenoir Studios. Built two Unreal Engine **editor plugins** that let **AI agents** edit animation and test gameplay.

Work Experience

Activision Central Tech, Programming Intern

Sep 2025 – Dec 2025 (Krakow)

- Added **conditional cache** loading and saving based on transient zone entity hash in the asset build pipeline.
- Parallelized functions to **improve CPU usage** and overall performance.
- Reduced **compilation time** of certain classes up to 99% (67 sec -> 0.14 sec).
- Gained experience in **team collaboration**, **debugging**, proprietary tools usage. Version control using **Perforce**.

Cenoir Studios, Gameplay Programmer

Jan 2026 – Present (Warsaw)

- Implemented character movement system using MVP architecture and ScriptableObject-based **state machines**.
- Integrating KINEMATION procedural animation for movement.
- Working with Zenject **dependency injection** framework and feature-oriented architecture.

Projects

Call of Duty: Modern Warfare 4

- **Description:** first-person shooter developed by Infinity Ward and published by **Activision**. Features a single-player campaign, a multiplayer, and round-based extraction modes.
- **Role:** Engine programming intern
- **Contributions:** refactoring code and implementing optimization features to speed up map compilation time.
- **Tools Used:** C++, COD Engine, Perforce

No Saints

- **Description:** dynamic multiplayer FPS game set in alternative history USA of 1930s. Developed as a diploma project.
- **Role:** Game Designer, Level Designer, Programmer
- **Contributions:** Designed levels, game mechanics, game modes and implemented **movement** and **combat** gameplay in Unity.
- **Tools Used:** Unity engine, C#
- **No Saints trailer**

Unreal MCP Toolsets

- **Description:** Two standalone Unreal Engine 5 editor plugins in C++ that expose editor functionality to AI agents through the Model Context Protocol (MCP).
- **Role:** Solo developer
- **Contributions:** AnimMCPToolset exposes Animation Blueprint graphs, state machines, blend spaces and montages as MCP tools. GameplayMCPToolset lets an agent verify gameplay itself via live PIE inspection, Enhanced Input simulation, console/log/Live Coding access and screenshots.
- **Tools Used:** C++, Unreal Engine 5, MCP, Toolset Registry, Claude Code
- **Code:** AnimMCPToolset | GameplayMCPToolset

Volunteer Experience

- **Women in Tech Summit 2024 (Warsaw):** Exhibited two games as part of the NekoDev and Anarchy Creations teams. Presented Salvager and System Breakdown to industry professionals and attendees.
- **Women in Tech Summit 2025 (Warsaw):** Exhibited No Saints, a diploma multiplayer FPS, as a playable build featuring an offline training map.
- **Game Jam at PJATK:** Developed Icarus Rising, a complete game built during the jam.
- **PJATK Museum Night:** Exhibited No Saints as a playable installation, with visitors able to play the offline training map or join multiplayer sessions across multiple devices.

Hobbies

I love playing games, reading comics, watching movies and TV series. I enjoy both short games like “Uncharted 4”, “God of War 2018” and “Metal Gear Solid 2”, as well as longer games, that allow for deep immersion in their worlds like “The Witcher 3”, “Red Dead Redemption 2” or “Cyberpunk 2077”. I even have a YouTube channel (in Ukrainian), where I talk about games and comic book movies.

In games, I value attention to details, a well-written story, an immersive world and a good mission design. I also love exploring games from a professional perspective, noticing some new layers to them. I enjoy learning new skills and am passionate about developing games.

I consent to the processing of my personal data for the purpose of recruiting for the position I am applying for. At the same time, I consent to the processing of my personal data for the purposes of future recruitment processes.
